

Olympic sales!

RepRapWorld wants to wish all Olympic athletes the best performance of their lives in Rio! May the odds be forever in their... er.. wrong event.

Anyway, we can't just let an event like this pass by without joining in with our own Olympic-level contribution!

All Olympic filament colors below are now on sale! We're offering 10% in price! It is now only €19,59 incl. VAT! See them all [HERE](#)

RealFlex

Olympic ping-pong players should try their hand at RealFlex; the rubber on their paddles and shoes could be made from it!

As our newest filament, we think we haven't explained and promoted the amazing capabilities of REAL Flex enough. Many folks think it is similar to Ninjaflex, when in fact it is amazingly strong, low-shrinkage and much easier to print at PLA-level speeds!

RealFlex is a biodegradable, environmentally friendly PLA compound with the strength and weather resistance of PETG, flexibility of TPC/TPU and ease of use of PLA. Optimal print temperature is between 195 - 210 deg C; heater bed not required. It will stick like no other filament you're ever tried!

Like all flexible 1.75mm filaments, we recommend a well-enclosed filament feed system that minimizes gaps between the extruder and hotend where the filament could kink. **We're also offering this filament with a 10% discount for the Olympic period!**

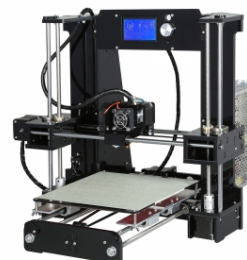

SUPERSALE! 10KG of Mystery filament for only €99,95 incl VAT. Mystery filament is the same

trusted REAL filament, but the color is slightly off spec. So this is ideal for prototyping, testing, or just printing your favorite models is a unique one-of-a-kind flavor.

New Prusa based printer! Only €320,- incl. VAT

Our Olympic target is to get as many people as we can into 3D printing! That's why we've brought a new low-cost 3D printer into our shop. For it's price, the printer is impressively high quality and boasts an acrylic frame.

The printer is delivered with a build manual, LCD controller and heated bed. You won't be able to find a cheaper one out there, so get yours quickly!

PRINT YOUR SUMMER!

Prints with RealFlex

Our regular customer Al Adrian has made a casing for his GoPro with RealFlex. Also several parts of his drone are made from RealFlex. Check it out at his YouImagine page: <https://www.youimage.com/designs/gopro-fpv-bumper>
